| 0                                                                                                                                                                                                                                                                                                                                                       | 0                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |

- ・氏名等を記入し、学生番号(縦に7桁)をマークすること。指示なく右枠はマークしないこと。
- ・[確]には学生番号の各桁の数字をバラして足したものの1の位をマークする

例 1141100 → 1+1+4+1+1+0+0=8 → 8      0941299 → 0+9+4+1+2+9+9=34 → 4

### 問題

容量Cのコンデンサと抵抗値Rの抵抗について

1:コンデンサ単体、コンデンサと抵抗の直列つなぎ、同並列つなぎのインピーダンスZを求めよ( $j\omega$ にて)

2:C=0.1[ $\mu$ F]( $0.1 \times 10^{-6}$ )、R=1[k $\Omega$ ]とした場合の、

- ・ $\omega = 100 = 10^2$ [rad/s]、 $\omega = 10$ [krad/s]= $10^4$ [rad/s]、 $\omega = 1000$ [krad/s]= $10^6$ [rad/s] における
- ・|Z|(絶対値)、 $\angle Z$ (偏角)を各々求めよ。(2桁以上離れる場合は近似可  $1+0.01j \doteq 1$ ,  $1+100j \doteq 100j$ )

回答欄(途中計算の場所が足りなければ裏へ)

コンデンサと抵抗を並列

コンデンサ単体

コンデンサと抵抗を直列
